Subject:	[Adviserlist] SLC Alert #10 -- Event Requiring Digital Projectors, Laptops, and/or Internet Access
Attachments:	ATT00001.txt

Dear FBLA Advisers

There are certain events that require the use of a digital projector, laptop or other device, and/or Internet access during their performances. Please make sure your students are prepared for their presentation in the following events, and please make sure your student competitors have read the guidelines for these AND all other competitive events.

Statement:
The individual or team must provide the computer (or other device) for the event. An LCD (digital) projector, screen, table, and electrical power will be provided onsite. Participants that will be utilizing Apple products or other devices that do not have a VGA port will need to provide their own adapters.

Participants may bring their own digital projector, if they choose, but they must work around the equipment that has been provided by PA FBLA and must return it to the location/position that it was if it was moved. All equipment must be set up by the competitor, and he/she must be able to troubleshoot any issues.

Do not assume that the projectors have an HDMI port, but the competitor may want to have an HDMI cable in case they encounter a projector with an HDMI port. Competitors may bring an adapter that allows an HDMI cable to a VGA port.

The above information applies to the following events. Take note whether Internet access will or will not be provided based on the PA FBLA Competitive Events Guidelines:

3D Animation
--no Internet

American Enterprise Project
--no Internet

Business Financial Plan
--no Internet

Business Plan
--no Internet

Coding and Programming
--no Internet

Community Service Project
--no Internet

Computer Game and Simulation Programming
