

RLC AND SLC TIEBREAKERS

Tiebreakers will be determined as follows:

Written Objective Tests

First tiebreaker:

All objective tests will be graded through the online test service. If there is a tie between competitors, the last ten (10) test questions will be compared and the individual/team with the highest number of correct answers will be ranked higher. The process will continue in groups of ten (10) questions until the tie is broken. If, after reviewing the entire test, the tie cannot be broken, the individual/team submitting the test in the least amount of time will be ranked higher.

Here are two tiebreaker examples:

Example 1:

Two students have scored a 90 on their RLC or SLC test.

In questions 91-100, Student A has 2 incorrect questions in that group of 10.

In questions 91-100, Student B has 3 incorrect questions in that group of 10.

Student A is ranked higher because he/she has fewer incorrect answers in the group of 10 questions.

Example 2:

Two students have scored a 90 on their RLC or SLC test.

In questions 91-100, Student A has 3 incorrect questions in that group of 10.

In questions 91-100, Student B has 3 incorrect questions in that group of 10.

Therefore, questions 81-90 (the next group of 10 questions) will be compared:

In questions 81-90, Student A has 5 incorrect questions in that group of 10.

In questions 81-90, Student B has 0 incorrect questions in that group of 10.

Student B is ranked higher because he/she has fewer incorrect answers in the group of 10 questions.

Second tiebreaker:

After all groups of 10 questions have been compared, participants or teams who submitted his/her completed test first will be rated higher.

Banking and Financial Systems, Business Management, Entrepreneurship, Customer Service, Future Business Leader, Hospitality and Event Management, International Business, Introduction to Event Planning, Management Information Systems, Marketing, Network Design, Parliamentary Procedure, Sports & Entertainment Management, Technology Support & Services

Ties will be broken based on scores of the objective test at the region level and to qualify for the performance component at the state level. Follow the procedures for written objective tests at the beginning of this section.

Computer Applications

Tiebreaker:

Highest number of points earned starting with the top row on the rating sheet.

Performance Events including Prejudged Events

Judges must make a definitive decision on ranking. Ties are not permitted. The decision of the judges is final.
